

Shri Saravanan,
Dy Manager (Comml)
Instrumentation Limited, Palakkad.

August 9, 2021

We appreciate the service support extended by Instrumentation Limited, Palakkad (ILP) during trouble shooting and re-erection/commissioning of 2100mm VBS butterfly valve at our JSW Steel, Dolvi Site which was successfully accomplished in last week.

During Erection at approximately 20 Mtr height platform, due to severe pipe stress, the vane movement got stuck and Team of TLT could solve the problem by relieving the pipe stress form both ends and finally rejoining the pipes avoiding additional pipe stress on the valve. During the course of action at site, ILP People present at site extended their best cooperation and remote support by their Design & Other Senior Service Officials from Palakkad is also appreciated.

All the Valves supplied by ILP for the JSW Dolvi site Gas Mixing Station Project are now successfully commissioned and all valves are operating satisfactorily.

With Best Regards,

For **TLT ENGINEERING INDIA PVT. LTD.**
